### CORE SKILLS

#### CLOUD PLATFORMS

AWS, GCP, Azure, VMware, Multi-Cloud  
Architecture, Landing Zones

#### IAC & CONFIG

Terraform (expert), CloudFormation, Ansible,  
Puppet, HCL, Policy-as-Code

#### CONTAINERS

Kubernetes (EKS, GKE, AKS), Docker, Helm,  
Anthos, ECS, Istio

#### CI/CD & GITOPS

GitHub Actions, Jenkins, ArgoCD, Flux, GitOps,  
Spinnaker

#### OBSERVABILITY

Prometheus, Grafana, ELK Stack, Datadog,  
CloudWatch

#### SECURITY

IAM, Zero-Trust, OPA/Gatekeeper, Secret Mgmt,  
Compliance

#### LANGUAGES

Python, Bash, YAML, JSON, HCL, PowerShell, Go

### EDUCATION

#### MTech (Master of Technology)

Birla Institute of Technology

### LANGUAGES

|         |              |
|---------|--------------|
| English | Professional |
| Hindi   | Native       |

# Nirbhay Singh

Cloud & DevOps Architect | Multi-Cloud Platform Engineer

11+

Years Experience

50%+

Faster Deploys

30x

CI/CD Speedup

EUR 4M+

Cloud Savings

14+

Certifications

## PROFESSIONAL SUMMARY

Cloud & DevOps Architect with 11+ years running production infrastructure across AWS, GCP, and Azure at once -- not as three separate stacks, but as one governed platform built on shared Terraform modules, landing zones, and GitOps deployment. Cut deployment time 50%+, rebuilt a CI/CD pipeline to run 30x faster, and now orchestrates 1,000+ containers in production. Leads multi-cloud platform strategy at Bosch Europe, where FinOps governance under this remit has returned EUR 4M+ in savings.

## KEY ACHIEVEMENTS

- Architected multi-cloud platform strategy across GCP and AWS for Bosch Europe, unifying governance, networking, and security across 15+ business units
- Codified 1,500+ infrastructure resources in Terraform, cutting deployment time 50%+ and driving configuration drift to near zero
- Redesigned a CI/CD pipeline at Deloitte around parallel execution and caching, taking it 30x faster
- Ran multi-cluster Kubernetes (GKE, EKS, AKS, ECS) with GitOps via ArgoCD, orchestrating 1,000+ containers with automated scaling and self-healing
- Built the FinOps governance model behind EUR 4M+ in savings: tagging standards, right-sizing cadence, and reserved-capacity planning

## PROFESSIONAL EXPERIENCE

### Cloud & AI Architect

Dec 2022 - Present

#### Robert Bosch (Bosch Polska) Warsaw, Poland

- Defined landing zones, networking, identity, and governance for Bosch Europe's multi-cloud strategy across GCP and AWS
- Led the joint Google Cloud/AWS/Bosch Poland partnership, standing up architecture review boards and standardised deployment patterns
- Designed GKE and Cloud Run microservices platforms for enterprise AI workloads, with autoscaling, service mesh, and zero-trust security
- Built the FinOps practice behind EUR 4M+ in savings: optimisation, tagging governance, and cost-aware architecture reviews
- Mentored 20+ senior developers and architects on multi-cloud strategy, IaC, and Kubernetes operations across global teams

### Senior DevOps Consultant

Jun 2021 - Nov 2022

#### McAfee

- Automated infrastructure provisioning with Terraform across AWS, GCP, and Azure, cutting deployment time 50%+ with near-zero drift
- Ran production container platforms across GKE, EKS, AKS, and ECS with GitOps workflows and automated rollbacks
- Built an observability stack on Prometheus, Grafana, and ELK covering metrics, logging, alerting, and distributed tracing
- Wrote Python and Bash automation for infrastructure lifecycle management, secret rotation, and compliance scanning

### Senior DevOps Engineer

Dec 2018 - Jun 2021

#### Deloitte

- Cut AWS costs \$45,000 and sped up CI/CD 30x through architecture redesign, caching, and parallel execution
- Orchestrated 1,000+ containers on AWS Batch, Spot Instances, and EKS for distributed batch processing and analytics

- Unified security controls and networking across GCP, AWS, Azure, and OCI under a single IAM and audit-logging model
- Built data platform infrastructure on EMR, Redshift, and BigQuery with automated ETL and data governance

## Senior Cloud Infrastructure Engineer

Nov 2015 - Dec 2018

### PTC

- Designed fault-tolerant AWS architectures (EC2, RDS, S3, VPC) with multi-AZ deployments and automated failover
- Built disaster recovery strategies for hybrid and on-premise environments with defined RTO/RPO guarantees
- Managed 11,000+ server Windows infrastructure with Active Directory, Group Policy, and operations automation
- Led cloud migration planning and execution with PowerShell, Ansible, and custom migration tooling

## System Engineer

Mar 2013 - Jul 2014

### IBM

- Handled infrastructure operations, migrations, and P1/P2 incident response for enterprise production environments

## OPEN-SOURCE PROJECTS

### ShieldIaC -- AI-Powered IaC Security Scanner

>> [github.com/nirbhays/shieldiac](https://github.com/nirbhays/shieldiac)

Catches Terraform and CloudFormation misconfigurations before production, checking 100+ rules across 9 compliance frameworks (CIS, SOC2, HIPAA, PCI-DSS, NIST) and suggesting fixes via GPT-4.1.

STACK: Python, Terraform, CloudFormation, GPT-4.1, GitHub Actions

### InfraCents -- Terraform Cost Estimates on Every PR

>> [github.com/nirbhays/infracents](https://github.com/nirbhays/infracents)

Posts real-time AWS+GCP cost estimates on pull requests before merge, parsing Terraform automatically against live pricing APIs -- zero config.

STACK: Python, Next.js, Terraform, GitHub App, AWS/GCP Pricing APIs

### TokenMeter -- LLM Cost Intelligence Layer

>> [github.com/nirbhays/tokenmeter](https://github.com/nirbhays/tokenmeter)

Tracks token usage, cost, and latency across OpenAI, Anthropic, and Google, routing by task complexity to cut AI spend up to 60%. <5ms overhead.

STACK: Python, OpenAI, Anthropic, Google AI, Smart Routing, PyPI
