CORE SKILLS

GCP COMPUTE

GKE, Cloud Run, Compute Engine, Cloud Functions, App Engine, Anthos

GCP AI/ML

Vertex AI, AutoML, GenAI Studio, BigQuery ML, AI Platform Pipelines

GCP DATA

BigQuery, Cloud Storage, Dataflow, Dataproc, Pub/Sub, Cloud SQL, Firestore

GCP SECURITY

IAM, Cloud KMS, SCC, Binary Auth, VPC SC, Workload Identity

GCP DEVOPS

Cloud Build, Cloud Deploy, Artifact Registry, Config Connector

GCP NETWORKING

VPC, CLB, Cloud CDN, Cloud DNS, Interconnect, Private Google Access

IAC & CI/CD

Terraform (GCP), GitHub Actions, Jenkins, ArgoCD, GitOps, Flux

OBSERVABILITY

Cloud Monitoring, Cloud Logging, Cloud Trace, Prometheus, Grafana

EDUCATION

MTech (Master of Technology)

Birla Institute of Technology

PROFESSIONAL SUMMARY

5x Google Cloud certified Cloud & DevOps Architect with 11+ years running GCP at enterprise scale -- GKE, Vertex AI, BigQuery, Cloud Run, Cloud Build, Anthos. Leads the strategic Google Cloud partnership at Bosch Europe, where GKE platforms, Vertex AI pipelines, and BigQuery analytics now run across 15+ business units. Pairs that platform work with FinOps governance that has returned EUR 4M+ in documented cloud savings.

KEY ACHIEVEMENTS

- Leading strategic Google Cloud partnership for Bosch Poland: GCP architecture standards, governance, and platform engineering
- Designed Vertex AI and GKE-based ML/AI platforms adopted across 15+ Bosch Europe business units for enterprise search and automation
- Architected production GKE clusters with Anthos service mesh, Binary Authorization, and Workload Identity for zero-trust security
- Built BigQuery analytics pipelines at petabyte scale with optimised partitioning and materialised views
- Built the GCP FinOps model behind EUR 4M+ in savings: committed use discounts, preemptible VMs, BigQuery slot reservations

PROFESSIONAL EXPERIENCE

Cloud & AI Architect (GCP Lead)

Dec 2022 - Present

Robert Bosch (Bosch Polska) Warsaw, Poland

- Defined GCP landing zones, architecture standards, and governance policies for Bosch Poland's Google Cloud partnership
- Designed Vertex AI and BigQuery-powered ML/AI platforms -- including petabyte-scale analytics pipelines with optimised partitioning and materialised views -- adopted across 15+ Bosch Europe business units
- Architected production GKE platforms with Anthos service mesh, Workload Identity, Binary Authorization, and namespace-level multi-tenancy
- Built the GCP FinOps model behind EUR 4M+ in savings: committed use discounts, preemptible VMs, slot reservations
- Mentored teams on the GCP Well-Architected Framework, GKE operations, Vertex AI best practices, and Cloud Build pipeline design

Senior DevOps Consultant

Jun 2021 - Nov 2022

McAfee

- Ran production GKE clusters with node auto-provisioning, pod autoscaling, and automated security patching
- Built CI/CD pipelines on Cloud Build and GitHub Actions for GKE deployments with automated testing and canary analysis
- Automated GCP infrastructure with Terraform, cutting deployment time 50%+
- Built observability on Cloud Monitoring, Cloud Logging, Prometheus, and Grafana

Senior DevOps Engineer

Dec 2018 - Jun 2021

Deloitte

- Built BigQuery data platforms for enterprise analytics with automated ETL via Dataflow and Cloud Composer
- Unified security controls across GCP, AWS, Azure, and OCI under a single IAM and audit-logging model
- Orchestrated containerised workloads across GKE and EKS for distributed data processing at scale

- Redesigned Cloud Build around caching and parallel execution, taking CI/CD 30x faster

Senior Cloud Infrastructure Engineer

Nov 2015 - Dec 2018

PTC

- Designed cloud architectures for production workloads, establishing patterns later reused in GCP migrations
- Built disaster recovery strategies with cross-region replication and automated failover testing

System Engineer

Mar 2013 - Jul 2014

IBM

- Handled P1/P2 incident response and root cause analysis for enterprise production systems

OPEN-SOURCE PROJECTS

InfraCents -- GCP Cost Estimates on Every Terraform PR

>> github.com/nirbhays/infracents

Posts real-time GCP cost estimates on Terraform pull requests by parsing diffs against the live GCP Pricing API -- zero config.

STACK: Python, Next.js, Terraform, GitHub App, GCP Pricing API

ShieldIaC -- AI-Powered IaC Security Scanner

>> github.com/nirbhays/shieldiac

Scans Terraform for GCP security misconfigurations pre-production against 100+ rules across CIS GCP Benchmark, SOC2, HIPAA, PCI-DSS, and NIST, with GPT-4.1 fix suggestions.

STACK: Python, Terraform, GPT-4.1, GitHub Actions

TokenMeter -- LLM Cost Intelligence (Google AI Support)

>> github.com/nirbhays/tokenmeter

Tracks token cost across Google AI (Gemini), OpenAI, and Anthropic, matching tasks to the optimal model to cut AI spend up to 60%.

STACK: Python, Google AI, OpenAI, Anthropic, Smart Routing, PyPI
