L	Warsaw, Poland

CORE SKILLS

OBSERVABILITY

Prometheus, Grafana, ELK Stack, CloudWatch, Cloud Monitoring, X-Ray, Datadog

SRE PRACTICES

SLO/SLI/Error Budgets, Incident Response, Post-Mortems, Capacity Planning, Chaos Engineering, Toil Reduction

KUBERNETES

EKS, GKE, AKS, Docker, Helm, Anthos, Istio Service Mesh

CLOUD PLATFORMS

AWS, GCP, Azure, Multi-Cloud, Landing Zones

IAC & AUTOMATION

Terraform, CloudFormation, Ansible, Puppet, Python, Bash, PowerShell

CI/CD & DEPLOYS

GitHub Actions, Jenkins, ArgoCD, Canary, Blue-Green, Rolling

DR & HA

Cross-Region Replication, Automated Failover, RTO/RPO, Backup, Multi-AZ

SECURITY

IAM, Zero-Trust, ShieldIaC, OPA/Gatekeeper, Compliance

EDUCATION

MTech (Master of Technology)

Birla Institute of Technology

LANGUAGES

English	Professional
Hindi	Native

Containers

99.99%

Uptime Target

14+

Certifications

PROFESSIONAL SUMMARY

Site Reliability Engineer and Cloud Architect with 11+ years keeping production systems up across AWS, GCP, and Azure -- observability (Prometheus, Grafana, ELK), Kubernetes operations (EKS, GKE, AKS), SLO/SLI-driven engineering, incident response, and disaster recovery. Managed 11,000+ server infrastructure at PTC, orchestrated 1,000+ containers at Deloitte, and now architects multi-cloud platforms at Bosch Europe. Builds open-source tools for reliability before an incident happens: ShieldIaC for security scanning, InfraCents and TokenMeter for cost anomaly detection.

KEY ACHIEVEMENTS

- Built observability stacks on Prometheus, Grafana, ELK, and CloudWatch: unified metrics, logging, alerting, and distributed tracing
- Ran production Kubernetes (EKS, GKE, AKS), orchestrating 1,000+ containers with automated scaling, health monitoring, and self-healing
- Designed disaster recovery with cross-region replication, automated failover, and validated RTO/RPO testing
- Managed 11,000+ server infrastructure at PTC with Active Directory and automated failover, holding a 99.99% uptime SLA
- Led P1/P2 incident response across every role: escalation management, root cause analysis, blameless post-mortems

PROFESSIONAL EXPERIENCE

Cloud & AI Architect (Platform Reliability)

Dec 2022 - Present

Robert Bosch (Bosch Polska) Warsaw, Poland

- Architected multi-cloud platforms on GCP and AWS for Bosch Europe with 99.99% uptime targets and automated incident detection
- Designed GKE and Cloud Run platforms with pod disruption budgets, autoscaling, health probes, and automated rollback
- Defined the SLO/SLI framework for platform services, plus structured logging and distributed tracing (Cloud Trace), driving error-budget-based release decisions
- Built proactive reliability tooling: anomaly detection, IaC security scanning (ShieldIaC), and infrastructure drift monitoring
- Mentored 20+ engineers on SRE practices, incident response, and blameless post-mortems

Senior DevOps Consultant (Platform Reliability)

Jun 2021 - Nov 2022

McAfee

- Built a production observability stack: Prometheus metrics, Grafana dashboards, ELK logging, and on-call runbooks
- Ran production Kubernetes across GKE, EKS, AKS, and ECS with automated node patching and security updates
- Automated infrastructure with Terraform, cutting manual toil 50%+ and removing configuration drift as a reliability risk
- Wrote incident response runbooks and automated remediation scripts for common failure modes

Senior DevOps Engineer

Dec 2018 - Jun 2021

Deloitte

- Orchestrated 1,000+ containers on AWS Batch, Spot Instances, and EKS with automated health monitoring and graceful degradation
- Sped up CI/CD 30x while adding reliability gates: automated testing, security scanning, and canary analysis

- Unified security controls and monitoring across GCP, AWS, Azure, and OCI under centralised audit logging
- Cut AWS infrastructure cost \$45,000 while holding SLO compliance through resource optimisation

○ Senior Cloud Infrastructure Engineer

Nov 2015 - Dec 2018

■ PTC

- Managed 11,000+ server Windows infrastructure with Active Directory and high-availability clustering, holding a 99.99% uptime SLA
- Designed disaster recovery with cross-region replication, automated failover, and documented RTO/RPO testing
- Led zero-downtime cloud migrations with automated rollback and canary traffic shifting
- Built operations automation in PowerShell and Ansible, cutting MTTR for common incidents 60%+

○ System Engineer

Mar 2013 - Jul 2014

■ IBM

- Handled P1/P2 incident response, escalation management, and root cause analysis for enterprise production systems
- Ran infrastructure operations, change management, and migration planning in high-availability environments

■ OPEN-SOURCE PROJECTS

ShieldIaC -- Proactive IaC Security Scanner

>> github.com/nirbhays/shieldiac

Prevents production security incidents at the IaC layer, scanning Terraform and CloudFormation against 100+ rules across 9 compliance frameworks (CIS, SOC2, HIPAA, PCI-DSS, NIST), with GPT-4.1 fix suggestions.

STACK: Python, Terraform, CloudFormation, GPT-4.1, GitHub Actions

InfraCents -- Infrastructure Cost Anomaly Prevention

>> github.com/nirbhays/infracents

Catches unintended resource scaling before it becomes a reliability issue, showing the exact cost impact of a Terraform change before merge.

STACK: Python, Next.js, Terraform, GitHub App, AWS/GCP Pricing APIs

TokenMeter -- LLM Performance & Cost Monitoring

>> github.com/nirbhays/tokenmeter

Monitors LLM latency, token usage, and cost across providers, routing to keep performance SLOs intact while cutting spend 60%, at <5ms overhead.

STACK: Python, OpenAI, Anthropic, Google AI, Smart Routing, PyPI
